

# COVID-19: case 2

G.Patelli, F.Besana, S. Paganoni, A. Lenzi, F. Codazzi, L.Di Mare, G.Esposito, C. Sala

UOC Radiologia ASST Bergamo Est Direttore Dr Gianluigi Patelli

62-year-old male patient with fever, cough and asthenia for three days. No previous medical history. pO<sub>2</sub> 97%, C.RP 0.75.

Chest radiography:

negative.

Due to the discrepancy between CXR and the clinical examination a CT is performed.

Scattered blurred ground-glass opacities suspected for early stage on interstitial pneumonia.

Nasal swab positive for SARS-CoV-2.
