

COVID-19: case 9

A cura di G.Patelli, A. Lenzi, F.Besana,S. Paganoni,, F. Codazzi, G.Colao, C.Coluccia, E.Faietti, G.Ghilardi

UOC Radiologia ASST Bergamo Est – Direttore Dr. Gianluigi Patelli

73-year-old female
patient with fever and respiratory distress.

The patient was intubated in the shock room immediately after a chest film for worsening of her respiratory failure.

Chest film:

RX torace a letto
multiple and diffuse consolidations with interstitial markings

CT

Diffuse ground-glass opacity with confluent consolidations in the dependent areas and peripheral band atelectasis.
