

COVID-19: case 19

Claudio Bnà, Lorenzo Monfardini, Fondazione Poliambulanza
Istituto Ospedaliero, Brescia

Acute sinusitis treated with Tavanic for 10 days (held on February 28, 2020), followed by fever and cough in treatment with paracetamol with no benefit. Onset of asthenia, diarrhea and hyporexia since the day before the admission to the ED. T.39°C. C-RP 23 mg/l, RT-PCR on a nasopharyngeal swab positive for SARS-CoV-2.
